

SERVICE: CIVIL ENGINEERING- STAFF AUGMENTATION _011

Provide a qualified individual for design, review and/or stamping of roadway and transportation engineering plans for the installation, construction or modification of roadway and/or traffic control devices. Responsibilities include the review and preparation of plans, field investigation, evaluation, and inspections of associated plans, standards, details, specifications, and contract documents. Experience in school-related, off-site development, and emergency repairs. Review and develop traffic control plans for various right-of-way activities.

Firms may be interviewed for this Service. Individuals will work under the supervision of a Clark County Professional Engineer. **No substitution of personnel will be allowed.**

Minimum Qualifications

FIRM EXPERIENCE

- Minimum of one, up to five, civil engineering projects administered by the firm in the last six years.
- Traffic engineering projects including the design, drafting, and preparation of plans, specifications, and contract documents for the installation, construction, or modification of traffic control devices, such as traffic signal and lighting systems, traffic signs, pavement markings, channelization, and geometric design.

Only submit firm projects on which the proposed engineers have worked on. Firm projects must match employee's resume.
